

Experience the new public square being built at Cote Vertu Metro Station in Virtual Reality!

BEAM ME UP

Interested in Virtual Reality technologies? As part of the student design-build competition mentioned in last week's Intercom, IDEAS Studio has invited Yan Cyr from Beam Me Up AR/VR Lab (a local Saint-Laurent firm) to present a project they completed last summer for a pop-up event at the site of the future square. Their project allowed citizens to visualize and walk through the newly designed square using VR Googles.

Come to N331 at UB on March 1 and experience it yourself. Note: priority will be given to students registered in the design-build competition.
